Goal 1. Improve the understanding and philosophy among stakeholders, providers, and state agencies of Community Life Engagement based on accepted national standards (Four core pillars) and in alignment with best practice.

Long Term Outcome: Support Coordinators and Providers (DSPs) become creative champions of community life engagement.

Indicator:

- Support Coordinators and Providers (DSPs) demonstrate understanding of the difference between community life engagement and community presence
- Meaningful conversations about Community Life Engagement are correctly documented in the ISP by the Support Coordinator

1.2.3 Develop technical assistance examples for how to document a meaningful conversation	User friendly, simple "how to" resources to document a meaningful conversation are created and shared	Support Coordinators have increased knowledge and confidence in their documentation of meaningful conversations	facilitating meaningful conversations 86% of Support Coordinators who respond to a survey regarding the their use of the resources developed know documentation expectations and how to document meaningful conversations within 6 months after dissemination	
1.2.4 Develop a plan for dissemination	A plan is developed and implemented	Support Coordinators are aware of available resources to facilitate and document meaningful conversations opportunities and resources.	Support Coordinators access available resources and request technical assistance/guidance when needed (Follow up on how to calculate access and use)	

FY 23 Update: The Community Engagement Advisory Group has been working on developing a training on Community Life Engagement. This training was developed and is under review for input from individuals with lived experience. Additional, the Committee began gathering information on a meaningful conversation from individuals who participate in the Arc Ally Alliance. These two documents are in the beginning stages and will be finalized in the first half of FY 2024.

Community Life Engagement Logic Model:

INPUTS, OUTPUTS, AND OUTCOMES

Goal 2. Improve the understanding of the services and supports that can lead to community life engagement.

Long-Term Outcome: Increase the number of individuals who have opportunities for community life engagement in alignment with best practices.

Indicators:

- # of people involved in CE, CC
- # of people using In Home/Companion for Community Involvement
- NCI data

Inputs	Activities	Outputs	Outcomes - Initial	Outcomes - Intermediate	Outcomes - Ultimate
IF	THEN IF	THEN IF	THEN IF	THEN IF	THEN
DBHDS CEAG Providers DBHDS	2.1.1 Identify the allowable activities under CE/CC and how they lead to CLE	Creative examples of how CE/CC allowable activities can lead to community life engagement are developed and technical assistance is offered	Providers have concrete examples of providing CE/CC in a manner that supports CLE	There is an increase in the number of providers seeking TA to better ensure CLE when providing CE/CC services (need to track numbers to demonstrate an increase)	An increased number of individuals experience meaningful CLE
CEAG Providers Self-advocates	2.1.2 Identify best practices in CE/CC	 CE and CC providers who demonstrate excellent CLE results are identified Best practices based on interviews with identified providers/staff, interviews with individuals receiving CE/CC, review of ISPs, and observations of 	 Exemplary providers are recognized and feel a sense of pride and accomplishment with the recognition Best practices are shared in engaging vignettes/stories using multiple formats (training, 	The positive reinforcement furthers the commitment to ensuring meaningful CLE (track number of providers recognized and get their feedback regarding impact of recognition, possibly a focus group) Best practice resources are consistently	

	service provision are cataloged and shared	print/digital, social media/Quillo)	referenced, promoted, and accessed resulting in increased CLE clarity and competency (can analytics be set up to track access to resources? DBHDS could track how often resources are shared e.g. provider roundtable, IFSP Council)

	2.2.2 Provide examples of h to leverage other services for CLE	leveraging i services to f	e examples of dentified facilitate CLE ed and shared	Providers have increased claritintegrating CLE other services	•	Providers use in clarity to impro incorporation or practices into s provision	ove the of CLE	
	2.2.3 Provide FAQ of to do' and not to do's related utilization of CLE practices across all services		t includes CLE Don'ts"	Providers have knowledge and assess their cur practices	tools to	Providers modi training and su	•	

	across identified services is developed and shared	of staff to incorporate "Dos" and "Don'ts"	
2.2.4 Create a self-evaluation tool for providers to assess their level of CLE			
2.2.5 Create a tool for individuals and families to assess the level of CLE they are provided			

FY 23 Update: Community Engagement Advisory Group drafted an allowable activities document that demonstrated how various activities can occur under multiple services and how they can lead to Community Life Engagement. The group asked that this document be disseminated for more feedback from the community. The Community Engagement Advisory Group drafted a tool to help providers and individuals/families to assess whether the program is minimally to engaging in best practice related to Community Life Engagement. The team will finalizes this in the next 6 months.

Goal 3: Ensure Community Engagement services are being offered and provided to individuals across the state in the most integrated community settings based on the needs of the individual determined through the person centered planning process.

Long-Term Outcome: Providers who are successfully implementing Community Engagement in the community

Indicators:

- Regional Meetings held to discuss Community Engagement best practice.
- Training and Technical assistance provided as requested.

Inputs	Activiti	es	Outputs		Outcomes -	Initial	Outcon Interme		Outcomes - Ultimate
IF	THEN	IF	THEN	IF	THEN	IF	THEN	IF	THEN

	3.1.1 CEAG to review DBHDS day service provider list and identify capacity of current providers to provide CE/CC	Develop a plan to increase capacity in parts of the state where supports and services are under-represented	Increase provider capacity by 40%	Increase provider capacity by 80%	There are no longer waitlists for services and individuals have access to supports they need.
	3.1.2 Work with RQCs/Provider development to provide information to be used with providers about expanding services to include Community Engagement	Fact Sheets/Training that explain successful ways other providers have implemented the services and built capacity	SAA	SAA	SAA
	3.1.3 Develop a group of provider experts who are willing to support and encourage other providers to transition to CLE	Create list of providers who are implementing Community Engagement according to the appropriate philosophy	Half of providers are willing to be mentors	All Providers are willing to be mentors	All providers deliver CLE according to appropriate philosophy
		Create list of providers who need additional support shifting model to more appropriately align with philosophy	40% of providers transition to align their practices with CLE philosophy	80% of providers transition to align their practices with CLE philosophy	SAA
Strategy 3.2:	dentify current barriers to deliver	ng services			
Inputs	Activities	Outputs	Outcomes - Initial	Outcomes - Intermediate	Outcomes - Ultimate
IF	THEN IF	THEN IF	THEN IF	THEN IF	THEN
	3.2.1 Conduct survey of providers to identify barriers to delivering CE/CC	Develop a plan to reduce those barriers.	Implement the plan and accomplish at least 35% of the plan	Implement the plan and accomplish at least 75% of the plan	Eliminate barriers to delivery of services

3.2.2 [barrie	Develop plan to address rs		
•	Review allowable activities- guidance Review licensing regulations- guidance ISP requirements- guidance Risk and Liability		

FY 23 Update: The CEAG conducted one survey during a Provider Roundtable to gather barriers related to Community Engagement Services. The Group has also discussed potential data for collection and review that would help with provider capacity development. Currently the Department publishes the Provider Data Summary report that contains information on provider availability and number of people accessing the services.

Goal 4: Ensure that there is an increase in meaningful Community Life Engagement for each individual.

Long-Term Outcome: Determine value of collecting and utilizing data to increase meaningful CLE

Indicators:

- Initial data tracked, reviewed and summarized.
- Additional data collection methodologies determined and implemented.
- New data tracked, analyzed, and summarized for impact on increasing community integration

Strategy 4.1: Review currently collected CLE data									
Inputs	Activities		Outputs		Outcomes -		Outcomes -		Outcomes –
					Initial		Intermed	diate	Ultimate
IF	THEN	IF	THEN	IF	THEN	IF	THEN	IF	THEN

t a	4.1.1 Discuss data we would like to collect, from what sources, and how we collect that data (SCQR, QSR, WaMS, PCR, QRT, HSAG, Licensing, etc.)	Identify data, sources and method for collecting data	Collect data and begin reporting	Monitor data and identify potential recommendations based on data	All individuals who want service have access to the service
t	4.1.2 Monitor utilization of CE/CC through authorization data/claims data	Identify specific data and request data from OISS and Data Trust	Monitor data and identify potential recommendations based on data	Increased utilization of CE/CC throughout the Commonwealth	All individuals who want service have access to service

FY 23 Update: DBHDS has met with the CEAG and has discussed a variety of data to collect around Community Life Engagement. A review of in-home and companion indicated that individuals access their community in a variety of ways. The RQC is also looking at data around Community Involvement. The Committee will continue to discuss and make plans for data collection.
